

Train Your Team In Your Practice!

Customised Training to Suit Your Needs

Sick of sending your staff multiple courses to cherry pick the relevant information for your practice? Tired of spending money and time on content that doesn't address your issues? Why not tailor the training to suit *your* team's needs?

At Momentum, we understand that not all practices have the same challenges, which is why we work with you to develop the content for a customised In Practice Training. We make sure that the training is of value to you, is applicable to your practice and is relevant to your interests.

You can train your entire team in one go, or target the training for specific roles in the practice. Custom-designed trainings are an affordable way to teach your team what *you* want taught.

Plus! As trainings are held in *your* practice, there's no need for staff travel - thereby limiting disruption to your business.

- **Training custom designed to meet your needs**
- **Relevant topics for your unique Practice**
- **Affordable whole team training or targeted group trainings**
- **No need for staff travel**
- **Limit disruption and maximise production**

Trainings Developed to Maximise Value and Effectiveness for Your Practice!

Whether you require a specific area of training or a combination of a few items, you will find Momentum's In Practice Trainings to be cost effective and less disruptive than sending your team members off to multiple courses.

Our experienced trainers *come to you* and work with you to develop a training that meets your unique interests.

Contact us today on 1300 519 000, or email info@momentummanagement.com.au to speak with a consultant about designing your customised training!

What our practices have to say:

"Highly recommended for anyone interested in the psychology of what we do... and the systems they create a win-win-win"

Dr Kate Amos, Coffs Harbour

"I can clearly see now why they have such a fantastic reputation... Exceeded my expectations!"

Dr Thomas Vo, Sydney

"It was absolutely mind blowing and I can start using this with patients on Monday!"

Dr Kalyan Voruganti, Melbourne
