

Family Care

“For our family, Chiropractic care has relieved pain, eased discomfort and has been essential in maintaining good physical health.”

We are a family of three and live an active lifestyle. We have been very involved in the martial arts for over 20 years as well as many other sports lifting weights, running cycling, skiing, golf racquet sports etc. We do not use pain relieving drugs or relaxants for physical ailments unless absolutely necessary, We have throughout the years sought Chiropractic care.

We have switched over to Dr. Patrick because he treats the areas that need to be addressed and not the entire spine all at once just because you're there.

For our family, Chiropractic care has relieved pain, eased discomfort and has

been essential in maintaining good physical health. Our confidence in Dr Patrick has allowed us to entrust him with the care of our son since the age of 10. Our son, Evan, is very aware about the surroundings of good health and knows to ask to see Dr. Patrick for an adjustment especially after times of strenuous and rough activity.

Adjustments by Dr. Patrick typically results in immediate relief for us and our son Evan. Dr. Patrick is very knowledgeable and informative as well as approachable regarding spinal health as well as health in general and Dr. Patrick has been excellent in maintaining our family's health.

- Eliseo, Evan & Bethli
