

Family Care

“I'm so grateful for the treatments that I did receive during that time as it helped alleviate the aches and pains and I'm confident it contributed to my wonderful short, and drug free, birth too!”

I started seeing Dr Maguire about 3 years ago and was thoroughly impressed with his care. He helped my lower back problems as well as curing me of regular headaches! Needless to say when I became pregnant I continued treatments knowing that pregnancy can put a lot of strain on the lower back and hips. I'm so grateful for the treatments that I did receive during that time as it helped alleviate the aches and pains and I'm confident it contributed to my wonderful short, and drug free, birth too! I refer everyone I know to him and my whole family, including my baby, see him regularly. Chiropractic works and I encourage anyone to try it, and even if you have been to one before, try Dr Maguire you'll be so impressed with his level of care, compassion and skill.
