

Pregnancy/ Breach Baby

“If it wasn't for Dr. Pat I would be booked in for a C-section.”

I started going to see Dr. Pat when I was pregnant with my first child as my husband was already going to him after a car accident he was in. I had so much back pain in that pregnancy until I started seeing Dr. Pat, it was amazing how fast my pain was gone. In my second pregnancy I had not been going and it was not until my body seized up that I thought, I should really call Dr. Pat. I was over thirty weeks, I could barely walk my hips and back were so out of alignment and our baby was lying transverse so our doctors began discussing our options, which there are few. When I went to see Dr. Pat he knew exactly what was wrong, explained to me why the baby was "stuck" transverse and started to work at giving my body room for the baby to turn. I was able to walk without pain after two visits and after six visits the baby moved head down. I was more comfortable, my lungs had room to breathe and I could be active again.

If it wasn't for Dr. Pat I would be booked in for a C-section, thank you so much Dr. Pat!!!
