

## Pregnancy/ Breach Baby

*“After only three (chiropractic) visits, my maternity doctor confirmed that my baby's head was now in the right place.”*

When I was 31 weeks pregnant, I found out that my baby was breech. I immediately panicked and started doing research to try to figure out how to turn her. I was referred to Dr. Maguire who uses the Webster's Technique during chiropractic appointments to aid in turning babies. After only three visits, my maternity doctor confirmed that my baby's head was now in the right place. Thank you Dr. Maguire, for turning my baby and as a result, making the remainder of this pregnancy stress-free.
