

# Wonderful Adjustments

*“I went under care with Dr. Maguire, the following week and in 3 weeks I was, for the first time in five years, completely pain free.”*

I had suffered with severe abdominal pain for over 5 years and had been to many medical specialists who did a great many medical exams. The medical doctors could not definitively say why I was in so much pain but in the last examination they had performed an MRI and found what they thought was a polyp on the back of my pancreas. Without any other explanation as to why I was in such pain, they wanted me to go in for exploratory pancreatic surgery. In explaining this to me they also told me that the surgery was very risky and that there was a 20% chance that I would die from the procedure.

I am a happy person, a wife, a mother and a grandmother and to be told that I may not survive the surgery and that it may not even improve my condition was very distressing.

I met Dr. Maguire while he was doing a presentation at Bow Valley College. After listening for some time, and waiting for the other people to clear, I approached Dr. Maguire to ask if he thought he could help me. After listening closely to what I had to say we sat down and he kindly explained to me how the body had the amazing ability to heal and how this can be interfered with by misalignments of the spine that interfere with our nerve system and thereby our entire body.

I went under care with Dr. Maguire (Dr. Pat) the following week and in 3 weeks I was, for the first time in five years, completely pain free.

As a result there was no need for the very risky surgery and I am health and so amazingly happy ... and a Grandmother to two more little ones 😊

I had no idea that adjustments to the spine could have such remarkable and far-reaching effects. I am also confused as to why my Medical Doctor and all of the specialists didn't think to refer me to a Chiropractor before suggesting such a risky surgery.

I see Dr. Maguire on a regular basis to assure that the terrible pain in my abdomen doesn't return and to keep my body truly healthy. My family now goes to Dr. Maguire too. There was a period where I just couldn't find the time to get over to see Dr. Maguire and after a few months of missing my adjustments the pain returned. I was very scared and Dr. Maguire was very concerned. We started care again and the pain again went away and it is certain, I will not be missing my appointments again.

Thank you Dr. Maguire for your kind and wonderful help.

Matija P.
