

Family Care

“I Could Not Walk a City Block ... Now I Can Easily Walk 18 Holes of Golf!”

I had suffered with back pain on and off for many years until one year (About 15 years ago) something happened. The pain was excruciating and the Medical Doctors told me that I needed surgery. After much deliberation, a complicated surgery and long recovery period the pain was diminished and I was ok.

Things were going fine until about 8 years ago ... the pain had returned but was even worse than before. I work in the oil business and walking to meetings downtown is a regular occurrence. Well, I just couldn't do it anymore. I would walk a city block, and then have to find a place to sit ... the pain was awful.

I went to other Chiropractors who tried to fix me but they could not and I was told that there was nothing more that could be done.

I saw Dr. Maguire (Dr. Pat) about 6 years ago, just after he had graduated with his doctorate from Palmer College of Chiropractic. I have known Dr. Maguire all his life and so I went in for an exam. After the exam he explained to me the results, went through my X-Rays with me and gave me his recommendations. I told him that I had been to other Medical Doctors and Chiropractors and they had said that there was nothing more that could be done, except perhaps a wheelchair to help me get round (Not an appealing option).

Dr. Maguire explained to me that there were over 100 published techniques of Chiropractic and that some he had high regard for and others he did not. He went on to explain the Chiropractic technique that he had studied and worked very hard to learn. The technique was called the Gonstead Method and though very difficult to learn, it was, in Dr. Maguire's educated opinion the best.

After my first adjustment, I was so much better ... and after just a few weeks I was pain free and could walk as far as I liked. I can now golf 18 holes with ease. It is as close to a miracle as I can imagine. I couldn't be more appreciative or more proud ... you see, Dr. Maguire, Patrick, is my son.

Sincerely,

Ray M.
