

Wonderful Adjustments

“I thought that Chiropractors only worked with the spine, but he has also helped me with issues in my knees, ankles and feet.”

I have had constant back discomfort for the past few years and having been previously reluctant to go to a Chiropractor. I finally went to see Dr. Maguire upon the recommendation of my friend. Since I began seeing him he has helped to significantly reduce my pain and discomfort and has done so with great care, consideration and professionalism. I thought that Chiropractors only worked with the spine, but he has also helped me with issues in my knees, ankles and feet. Dr. Maguire genuinely listens to my concerns and questions and always takes the time to help me understand what may be going on. Every visit has been a pleasant experience and as a patient it gives me great joy to see a practitioner that loves what he does.
