

Family Care

“After a few visits I was functioning normally and continued to throughout my pregnancy.”

My husband first went to see Dr. Pat after being in a car accident, he was rear ended by a semi truck and months after he was still having horrible back problems and was constantly in pain. Dr. Pat was able to alleviate that pain and turn his life around. Today my husband is physically fit and enjoying the things he loves, like hockey and martial arts.

I was a skeptic when it came to chiro, it made me nervous. However, when I was pregnant my back got so bad that I could barely function, putting on socks was impossible and I often found myself in tears over the pain and frustration of it, I was not enjoying my pregnancy at all. I tried physio therapy and even wore a hip brace to help my lower back, nothing was helping. Finally my husband convinced me to go see Dr. Pat. I told Dr. Pat of my hesitance and he reassured me and talked me through everything. After a few visits I was functioning normally and continued to be throughout my pregnancy. Without Dr. Pat I can't imagine how horrible my pregnancy and labor would have been.

Dr. Pat even adjusted our son at a very young age!!

Thanks Dr. Pat!
