

Wonderful Adjustments

“After a month treatment I noticed improvement in my posture, relief of lower back and leg pain.”

I was suffering from lower back pain and later on I started feeling numbness with periodically burning in my right thigh. I was recommended to visit chiropractor. Luckily I had one working at the same department- Dr. Patrick J. Maguire. After my XR was done and analyzed by Dr. Pat he started treatment. The cause of lower back pain was bulging disk which did affect on sciatic nerve. After a month treatment I noticed improvement in my posture, relief of lower back and leg pain. I still continue visiting Dr. Patrick Maguire and obviously can see a progress and difference shown on Static EMG Scan Aptitude.

Thank you Dr. Pat for your professionalism.
