

Wonderful Adjustments/ TMJ Syndrome (Jaw Pain)

“After just 2 very gentle adjustments I could open and close my jaw and with NO PAIN at all!! I could chew again and enjoy a meal.”

I have known Dr. Maguire for all his life and shortly after he received his doctorate from Palmer College of Chiropractic, I asked him if he could help me. I have suffered from jaw pain (TMJ) for many years, which came on after a trip to the dentist. I have had minor jaw pain for many years but several years ago I was in for some dental work and had to have my jaw wide open for quite some time. It seemed that after that my jaw pain got progressively worse.

Over time, the pain continued to get worse. I was losing my ability to move my jaw and when I did there was a lot of pain. As I really couldn't open my jaw very wide at all I had to cut my food up into very tiny pieces and then I really could not bear the pain of chewing. One

night I just decided that I needed to see Dr. Maguire to see if he could help me.

I was very reluctant to see a Chiropractor as many years ago I had gone to a Chiropractor for headaches. My headaches did resolve, but I really didn't enjoy the experience.

I saw Dr. Maguire and after the exam and him sitting with me, carefully explaining what he thought was wrong and how he would very gently adjust my jaw and spine we proceeded.

It was AMAZING! After just 2 very gentle adjustments I could open and close my jaw and with NO PAIN at all!! I could chew again and enjoy a meal rather than spend an hour cutting it up into little tiny pieces, while it got cold, and then not being that interested in eating it at all ... it was very close to a miracle and it helped me so much!

I couldn't be more appreciative or more proud of Dr. Maguire, you see, he is my son.

With love always, your Mom,

-Wilma M.
