

COVID-19 WARNING/ ANTI-WARNING!

WHY YOU NEED TO GET HERE, NOW, ASAP!

CAUTION: If you believe that **EVERYTHING** in Medicine is correct and “scientific,” and that the government is always looking out for your benefit (“saving lives,” etc.), if you believe *everything* you’re fed by the mainstream media, *maybe you shouldn’t read this*. My intention is to inform those who are open enough to think for themselves. I don’t wish to offend anyone.

There are two versions of this “crisis” of Covid-19, which I call, in line with the way other viruses are named, “**Wuhan Bat Flu,**” or just **WBF**. OK, it’s a different family than influenza, but still... (The name, “Covid-19,” came from the WHO, as a purely political move. NOT scientific.)

Now, it’s over a year. Either you’ve been frightened out of your mind, or you’re mad as hell about this. Tensions are high that it’s become hard for one side to listen to the other. Hopefully, you are open-minded enough to read this, and make an informed decision.

To let you know, up front, I am in the “mad as hell” (think the old movie, “Network”) camp. No, I’m not denying that this is a real disease. What I am saying is that this situation is being vastly exaggerated, in order to sell vaccines and further government power

over our lives. Government “public health” entities, international, federal and local, seem to have a serious interest in **creating havoc and fear**.

The CDC and the NIH, including Dr. Fauci, have been wrong in every prediction, and have changed instructions to the public, repeatedly. **None of those instructions... masks, social distancing, lock-downs... have any basis in either current research, or in basic biology.** If

the mask works, why the social distancing? If social distancing works, why the mask? *If one or both work, why the lock-downs?*

We do have immune systems. Simply put, there are two parts. First, there is what is called innate immunity, which is a generalized response to any infectious agent. **(Some aspects of medical care, including serial vaccination and immunosuppressive drugs, actually diminish this natural response. Yes, some of Medicine is bad for you!)** The other part of the immune response is acquired immunity, which is from antibodies from previous contact with pathogens. So, if you've had a cold, which is the same family as Covid-19/Wuhan Bat

Flu, your body is better prepared.

Besides the very real possibility of advancing partisan political aims, instead of acting for the public welfare, the **CDC holds patents on 40 vaccines.** **They are in business!** While they approve and mandate vaccines, they profit off of them... *mightily!* Much of this WBF ruckus is, in my opinion, marketing for the WBF vaccines. These vaccines will not "save us." They will make us sick. Already, serious side effects, and numerous deaths have occurred. I predict a lot more will occur in the future. Will they announce the need for annual booster shots? You betcha!

WHAT HAVEN'T THEY MADE PLAIN ABOUT THE VACCINES? (1) All these vaccines are officially classified as "experimental." (2) The vaccines do not confer immunity. They only claim that if you get the disease, it will be less severe. (3) The vaccines do not prevent transmission.

CHEATING is the name of the game with their data. I know that most have been taught to trust the government, and to trust Medicine. Now is the time to think for yourself. Even at the beginning, Dr. Birx (Dr. Fauci's sidekick, from last year) publicly admitted that if someone dies in the hospital from cancer, heart attack, stroke... and they are Covid-positive, that's considered a "Covid" death. There have been so many reports of doctors and coroners who have been coerced into that diagnosis. And so many reports from people who have lost a loved one to a variety of diseases, but the death certificate said "Covid-19." Hospitals make thousands more with that diagnosis, and even more with ventilator use, which has led to overuse and even more

deaths. Now, with contact tracing, if someone positive reports being in contact with 47 people, they just add 47 to the total, without any testing.

You might assume that most medical testing is absolute and correct. Very often, it is not.

As far as hospitalizations, they are doing as they did for the death rates. Go into the hospital with a peptic ulcer or a kidney problem, if you're "Covid" positive, it's counted as a Covid case... part of the so-called surge. If you're tested multiple times, each time it's positive it is counted as a "case." Oh, the tests for WBF are also classified as "experimental"

MY VIEW: Now, the alleged death rate for Wuhan Bat Flu is over 500,000. With the gross level of cheating, I wouldn't be surprised if the real number is closer to 80 or 90,000. That would make it equivalent to a bad flu year.

A little history: 52 years ago, 1969, over 100,000 Americans were killed by the Hong Kong Flu, which hardly anyone remembers. We had no masks, no social distancing, no lock-downs resulting in massive job losses, business failures, drug overdoses, increases in domestic abuse, and suicide. No, we had none of that in 1969, WE HAD WOODSTOCK. And the nation survived. And the world survived.

THE WEIRDEST THING is how our "public health" officials (really **public sickness officials...** there is a HUGE difference) only talk about avoiding CONTACT with this very un-deadly virus, as if you don't have an immune system. The vaccines are designed to **pervert normal immune function**. Your immune system is designed to protect you against infection. The quality, the functionality of your immune system, along with every other system, is under DIRECT control

and coordination of your brain and nervous system. If there is INTERFERENCE to your nervous system, from spinal injuries healed wrong (what we call “Vertebral Subluxation Complex,” or VSC), your function suffers.

Many people assume that Chiropractic is about back pain. OK, people are helped with that, but back pain relief is a nice side effect. **The purpose of Chiropractic is to LIBERATE your brain and your nervous system, allowing your body to heal, and to function at a maximal level. THAT INCLUDES YOUR IMMUNE SYSTEM.** Chiropractic is NOT a treatment for WBF, nor is it direct prevention. It is the pursuit of Health. *This is different!*

There are so many studies linking Chiropractic and immune system function. Check this one out. It’s a bit old, but one of my favorites:

Therefore, during this so-called crisis, or anytime, you are far better off under true chiropractic care, for better health.

Besides that, here are some good things for your immune system, and health, in general:

- Eat well: Organic as much as possible, enough protein, watching sweets.
- Sunshine: Get outside! (One of the reasons that these lock-downs are so bad)
- Stress management, social interaction
- Adequate rest
- Regular exercise

Living your life in fear is no way to live. Come get checked for INTERFERENCE to your nervous system, to *allow* your body to heal, to function at a higher level, to express more LIFE.

PS: The 1918 “Spanish Flu” Pandemic: Now that was a *REAL pandemic*. Between 25 and 40 million people died, worldwide. The dead were piled up in the streets. The world’s population is now approximately eight times higher. 40 million x 8 = **320,000,000 dead**, *if* we had a similar pandemic. In 1979, Walter Rhodes wrote that, during the Pandemic, **medical doctors** in Davenport, Iowa treated 93,590 patients, with 6,116 deaths, in other words, **one out of 15** under medical care succumbed to the flu. At the Palmer College of Chiropractic in Davenport, **1,635 flu cases were adjusted, with only one fatality**. Outside of Davenport, Iowa chiropractors adjusted 4,735 flu cases, with only six deaths - **one out of 866**. *What can you learn from this? Chiropractic care saved far more people than medical care, and better chiropractic care... was even better!*
WHO YA GONNA CALL?
