Cardio-Plus®

Helps Maintain the Cardiovascular System

The cardiovascular system is the network of arteries, veins, and capillaries that carry blood back and forth from the heart to the tissues in the body. Blood carries oxygen, hydrogen, and carbon (in the form of simple sugars) to cells, for use as the basic fuel of the body. Blood carries other nutrients, including amino acids and vitamins, enzymes, hormones, and immune system factors and agents. For the cardiovascular system to function, the heart muscle must be strong and the blood vessels must be clear, unobstructed, and sufficiently dilated to adequately transport the blood. It is especially critical that the vessels carrying blood to heart tissues are healthy, so the rest of the body’s health is not compromised.†

How Cardio-Plus Keeps You Healthy

Helps maintain a healthy heart
Studies suggest that vitamin B₆ helps maintain a healthy and strong heart. Vitamin B₆ supplementation may also help maintain healthy blood pressure and circulation.†

Helps maintain proper levels of homocysteine in the blood
Choline maintains healthy homocysteine levels. Healthy homocysteine levels have been correlated with maintaining healthy blood-vessel diameter.†

Helps maintain proper vascular functioning
Coenzyme Q₁₀ protects lipoproteins in the blood from free-radical oxygen, helping maintain the health of the cell walls of the cardiovascular system.†

Cardio-Plus®

Introduced in 1956

Content:
90 tablets
330 tablets

Suggested Use: Two tablets per meal, or as directed.

Supplement Facts:
Serving Size: 2 tablets
Servings per Container: 45 or 165

Amount per Serving %DV
Calories 4
Cholesterol 5 mg 1%
Total Carbohydrate 1 g <1%†
Vitamin C 14.5 mg 25%
Vitamin E 2 IU 6%
Riboflavin 1.6 mg 100%
Niacin 14 mg 70%
Vitamin B₆ 0.5 mg 25%
Selenium 2.8 mcg 4%

*Percent Daily Values (DV) are based on a 2,000-calorie diet.

Proprietary Blend: 650 mg
Bovine heart PMG™ extract, bovine liver, choline bitartrate, calcium lactate, porcine stomach, bovine orchic extract, Tillandsia usneoides, defatted wheat (germ), para-aminobenzoate, nutritional yeast, allantoin, inositol, bovine spleen, ovine spleen, porcine brain, oat flour, and bovine adrenal Cytosol™ extract.

Other Ingredients: Honey, calcium stearate, ascorbic acid, niacinamide, mixed tocopherols (soy), arabic gum, selenium yeast, glycerin, riboflavin 5'-phosphate, and pyridoxine hydrochloride.

Two tablets supply approximately: 110 mg bovine heart PMG™ extract and 30 mg choline.

Sold through health care professionals.

Cardio-Plus®

What Makes Cardio-Plus® Unique

Product Attributes
Multiple nutrients from a variety of animal tissues
›› Extracts from bovine, porcine, and ovine tissues provide nutrients and support to the corresponding tissues in humans
›› Vitamins, minerals, and nutrients from animal tissues work synergistically for maximum effect
›› Contains naturally occurring Coenzyme Q10 from bovine heart PMG™ extract
›› A combination product formulated to support the cardiovascular system†

Contains Protomorphogen™ extracts
›› Standard Process uses a unique manufacturing method of deriving tissue cell determinants from animal glands and organs
›› Help provide cellular support and rehabilitation to the corresponding human tissues
›› Important antigenic properties of nucleoprotein-mineral determinants are the foundation of the product†

Manufacturing and Quality-Control Processes
Low-temperature, high-vacuum drying technique
›› Preserves the enzymatic vitality and nutritional potential of ingredients

Not disassociated into isolated components
›› The nutrients in Cardio-Plus are processed to remain intact, complete nutritional compounds

Degreed microbiologists and chemists in our on-site laboratories continually conduct bacterial and analytical tests on raw materials, product batches, and finished products
›› Ensures consistent quality and safety

Vitamin and mineral analyses validate product content and specifications
›› Assures high-quality essential nutrients are delivered

Whole Food Philosophy
Our founder, Dr. Royal Lee, challenged common scientific beliefs by choosing a holistic approach of providing nutrients through whole foods. His goal was to provide nutrients as they are found in nature—in a whole food state where he believed their natural potency and efficacy would be realized. Dr. Lee believed that when nutrients remain intact and are not split from their natural associated synergists—known and unknown—bioactivity is markedly enhanced over isolated nutrients. Following this philosophy, even a small amount of a whole food concentrate will offer enhanced nutritional support, compared to an isolated or fractionated vitamin. Therefore, one should examine the source of nutrients rather than looking at the quantities of individual nutrients on product labels.
