Glucosamine Synergy®

Combines Boswellia serrata with Vitamins, Minerals, and Glucosamine to Help Maintain Healthy Joint Function

Bones and supportive connective tissue, including cartilage, are in a constant state of renewal and restoration. Poor diet, not enough exercise, and excessive stress contribute to strain on cartilage and associated tissues. Glucosamine Synergy encourages healthy joint functioning by supporting the body’s natural cartilage, ligament, and bone regeneration function, encouraging natural tissue restoration and renewal, supporting healthy osmotic transfer of fluids, and providing vitamins and minerals to maintain optimal mobility.†

How Glucosamine Synergy Keeps You Healthy

Supports the musculoskeletal system
Glucosamine is an amino-monosaccharide, made naturally in the body, which helps form cartilage. Cartilage is the thick layer of strong and pliable connective tissue that covers the ends of bones to provide a uniform gliding surface for efficient joint motion. Glucosamine sulfate is the supplemental form of glucosamine that can help the body in the normal repair and rebuilding of cartilage. Boswellia serrata extract can help maintain healthy joint tissue by inhibiting the activity of certain enzymes and the release of pro-inflammatory compounds called leukotrienes.†

Provides many essential nutrients to support bone and tissue health
Calcium helps keep bone tissue strong, is essential for blood coagulation, vasoconstriction and vasodilation, nerve impulse transmission, muscle contraction, hormone secretion, maintenance and function of cell membranes and membrane permeability, and proper functioning of many enzyme reactions. Both calcium and magnesium are essential in the maintenance of bone structure and function. Magnesium is also essential for over 300 enzymatic reactions in the body, including synthesis of carbohydrates and fats for energy and the uptake of calcium and potassium. Nutritional yeast contributes B-complex vitamins to support macronutrient metabolism. Vitamin C supports collagen formation and the growth and repair of tissues. Vitamin A supports skin cell integrity. Vitamins E and C provide antioxidant protection.†

Glucosamine Synergy®

What Makes Glucosamine Synergy Unique

Product Attributes

Multiple nutrients from a variety of plant and animal sources

› Supports connective tissue and the natural healing process in joints

› Bovine and ovine tissues provide cellular support and rehabilitation to the corresponding tissues in humans

› Vitamins, minerals, and nutrients from plants and animals work synergistically for maximum effect

Contains Protomorphogen™ extracts

› Standard Process uses a unique manufacturing-method of deriving tissue cell determinants from animal glands and organs

Important antigenic properties of nucleoprotein-mineral determinants are the foundation of the product

Certified Organic Farming

A healthy ecosystem is created by using organic farming techniques, such as rotating crops, fertilizing the soil with nutrient-rich cover crops and byproducts from our processing, practicing strict weed-control standards, and continually monitoring the health of our plants

› Assures the soil is laden with minerals and nutrients

› Ensures plants are nutritionally complete and free from synthetic pesticides

Manufacturing and Quality-Control Processes

Upon harvesting, nutrient-rich plants are immediately washed and promptly processed

› Preserves nutritional integrity

Low-temperature, high-vacuum drying technique

› Preserves the enzymatic vitality and nutritional potential of ingredients

Not disassociated into isolated components

› The nutrients in Glucosamine Synergy are processed to remain intact, complete nutritional compounds

Degreed microbiologists and chemists in our on-site laboratories continually conduct bacterial and analytical tests on raw materials, product batches, and finished products

› Ensures consistent quality and safety

Vitamin and mineral analyses validate product content and specifications

› Assures high-quality essential nutrients are delivered
