

Consent For Treatment

I acknowledge that the practice of skin care including microdermabrasion, microneedling, massage, electrolysis, peels, facial and body treatments, phlebotomy in the use of PRP, laser treatments, tattoo removal, vein treatments, pigmentation treatments, and various other beauty or health procedures are not an exact science and no specific guarantees can or have been made concerning the expected results. I understand that some clients experience more change and improvements than others. In virtually all cases, multiple treatments are required in order to realize a difference. I also understand that the following risks and hazards may occur in connection with any particular treatment including but not limited to: unsatisfactory results, allergic reactions, poor healing, discomfort, redness, bruising, nerve damage, hyper/hypo pigmentation, crusting/ scabbing and increased hair growth. I understand that even though precautions may be taken in my treatment, not all risks can be known in advance. Given the above, I understand that response to treatment varies on an individual basis and that specific results are not guaranteed. Therefore, in consideration for any treatment received, I agree to hold harmless and release any liability from Madison Lynne, LLC, PGA Chiropractic Health Center, PGA Health Center, as well as any technicians, doctors, or employees of the above companies for any condition or results, known or unknown that may arise as consequence of any treatment I receive.

Use of Photos

I consent to the taking of photographs to monitor treatment results. I authorize the use of any photos/ videos/ before and afters to be released to Madison Lynne, LLC. All photographs shared or published in any manner will be altered to protect my anonymity.

Laser Treatment

The goal of the laser treatment, as any cosmetic procedure, is improvement not perfection. I understand my result may not be perfect. I understand the number of treatments necessary is dependent on many factors including skin color, hair color, genetics, medications, etc. and there may be more treatments necessary than anticipated. There is no guarantee that the expected or anticipated results will be achieved. Results will vary person to person.

The following complications are not likely however may occur:

Discomfort at the treatment site with transient redness and possible swelling. Decrease (hypo) or increase (hyper) in pigmentation typically lasting 1-3 months, however may take 3-6 months or longer to heal. Activation of cold sores or Herpes Virus. Folliculitis (inflammation of the hair follicle). Scars or loss of pigment. Small blisters and/or crusting/scabbing. Pinpoint bleeding or allergic reactions.

The laser center, medical staff, and technicians will not be held responsible if any of the above occur.
