CHIROPRACTIC CLINICAL OBJECTIVE

Physical, emotional and chemical STRESSES, common to our contemporary lifestyles, can result in misalignment of the spinal column causing damage to the nerve system. The result is a condition called Vertebral Subluxation. The Chiropractic exam/evaluation is specifically designed to detect Vertebral Subluxations in all phases of their progression.

Many common symptoms and conditions are caused by the interference and stress on the nerve system. Please place a (X) on conditions that you are currently suffering from and a (O) on any conditions you have had in the past.
