

Share Your Story With Others

Print your name: _____

Congratulations! You have joined the millions of people who have had a positive experience because of chiropractic. Literally thousands of your neighbors have been helped through chiropractic, right here in our clinic. For this we are thankful.

Unfortunately, for every one person we help, ten more continue to suffer only because they do not know about or understand how chiropractic can help them. These people will spend thousands of dollars and waste precious time on drugs and other treatments that may not help correct the underlying cause of their problem.

Many of these people could be helped if only they knew what you now know about chiropractic. It is for this reason that we ask for your help. Your story may be all they need to hear to help them make a decision that may just change their life. Please take a minute and fill out this testimonial sheet. Please print in complete sentences, and use additional paper if you need.

1. Please describe your health problems before receiving chiropractic care at our clinic. Please also mention how these problems used to affect your daily life or activity.

2. Describe how your health has improved under chiropractic care and how it is affecting your daily life. Especially mention any problems that may have improved that you did not expect could be helped with chiropractic.

Please Read: We thank you for taking the time to share your experiences with others. With your signature, you are granting permission to our clinic to use your testimonial either in its entirety, or in a shortened, edited form for display in our clinic, on our website, in presentations, or in any marketing pamphlets/brochures/etc. You are also acknowledging that you have not been paid or compensated for your testimonial in any way.
