CHILD HEALTH HISTORY FORMS 2-17 YEARS

Date: _____

At Parascak Family Chiropractic we focus on your ability to be healthy. Our goals are, first, to address the issues that brought you into this office, and second, to offer you the opportunity of improved health potential and wellness services in the future. Daily, we experience physical, emotional, and chemical stresses that can accumulate and result in serious loss of health potential. Most times the effects are gradual: not even felt until they become serious. Answering the following questions will give us a profile of the specific stresses you have faced throughout your lifetime, allowing us to better assess the challenges to your health potential.

Child's Name: _____

Address: _____ City: _____ Postal Code: _____

_____

_____

How long has he/she had this condition? _____

Has he/she had a similar condition in the past? _____

What makes it worse? _____

What relieves it? _____

Do you feel his/her symptoms have been getting: □ better □ same □ worse?

Is the pain: □ sharp □ dull □ burning □ tight □ throbbing □ numb?

Is this condition interfering with your: □ work □ home routine □ family?

What doctors have you seen about this condition? _____

Have you seen a Chiropractor before? □ No □ Yes, When? _____

Approximately how many visits? _____

FAMILY HISTORY

	Heart Disease	Arthritis	Cancer	Diabetes
Father's side	□	□	□	□
Mother's side	□	□	□	□

Other: _____

Why Chiropractic? People go to Chiropractors for a variety of reasons. Some go for symptomatic relief while others are interested in having the cause of the problem corrected.

Please check the type of care you desire for your child:

□ *RELIEF CARE* – is aimed at eliminating your symptoms or pain, but not the cause of it. It is the same as drying a floor that was getting wet from a leak, but not fixing the leak.

□ *CORRECTIVE CARE* – differs from relief care in that its goal is to get rid of symptoms or pain while correcting the cause of the problem. Corrective care varies in its length of time, but is more lasting.

INFORMED CONSENT TO CHIROPRACTIC TREATMENT

There are risks and possible risks associated with manual therapy techniques used by doctors of chiropractic; in particular you should note:

a) While rare, some patients may experience short-term aggravation of symptoms or muscle and ligament strains or sprains because of manual therapy techniques. Although uncommon, rib fractures have also been known to occur following certain manual therapy procedures.
b) There are reported cases of stroke associated with visits to medical doctors and chiropractors. Research and scientific evidence does not establish a cause and effect relationship between chiropractic treatment and the occurrence of stroke rather, recent studies indicate that patients may be consulting medical doctors and chiropractors when they are in the early stages of a stroke, there is a stroke already in progress. However, you are being informed of this reported association because a stroke may cause serious neurological impairment or even death. The possibility of such injuries occurring in association with upper cervical adjustment is extremely remote.
c) There are rare reported cases of disc injuries identified following cervical and lumbar spinal adjustment, although no scientific evidence has demonstrated such injuries are caused, or may be caused, by spinal adjustments or other chiropractic treatment.
d) There are infrequent reported cases of burns or skin irritation in association with the use of some types of electrical therapy offered by some doctors of chiropractic.

I acknowledge I have read this consent and I have discussed, or have been offered the opportunity to discuss, with my chiropractor the nature and purpose of chiropractic treatment in general, (including spinal adjustment), the treatment options and recommendations for my child's condition, and the contents of this consent.

I consent to the chiropractic treatment recommended to me by my chiropractor including any recommended spinal adjustments.

I intend this consent to apply to all my present and future chiropractic care.
