

Dr. Annie's 12-Week Weight Loss Program – Information

Weight gain or difficulty losing weight can be caused by many things, such as suboptimal diet and exercise, food sensitivities, excess or low cortisol, thyroid dysfunction, estrogen dominance, and others. Dr. Annie will help you determine the root cause.

This individualized weight loss program consists of weekly visits for 4 weeks (5 visits), then every two weeks for the remaining 8 weeks (4 more visits), and includes an initial intake, weigh-ins, measurements, nutritional counselling and a meal plan, supplement and lab test recommendations, acupuncture, and injections to boost metabolism and fat loss.

Visits

- First visit: 90 minutes for new patients (\$200), 40 minutes for existing patients (\$120)
 - Health history intake, weigh-in, measurements, BMR, and body fat percentage.
 - Naturopathic weight loss diet including individual calorie needs, recipes, grocery list, and a starter meal plan.
 - Exercise tips effective for fat loss and muscle retention will be made.
 - Lab test and natural supplement recommendations will be made based on symptoms and needs (cost variable).
 - A lipotropic intramuscular injection will be given into the shoulder muscle to help stimulate metabolism and fat loss (\$20).
- Weeks 2, 3, 4, 7, 11: 60 minutes (10 minutes if injection only)
 - Acupuncture (\$85*): reduce cravings and stress, and improve digestion, energy and sleep.
 - Lipotropic injection (\$20, \$30 if injection only, no acupuncture)
- Week 5 and 9: 70 minutes (30 minutes if weigh-in and injection only)
 - Acupuncture: acupuncture treatment + weigh-in, measurements and body fat percentage, + lipotropic injection (\$155)
 - No acupuncture: Weigh-in, measurements, and body fat percentage + lipotropic injection (\$110)
- Week 13: 30 minutes
 - Final weigh-in, measurements, body fat percentage (\$90)

*Note: acupuncture may be done with an acupuncturist to maximize your benefits if you have extra acupuncture coverage. The acupuncturist will perform their own assessment and determine their own point prescription. Pricing with an acupuncturist may be different, and note that an initial appointment with an acupuncturist may be priced higher.

Laboratory Tests

Various tests may be recommended for your individual situation. These tests may include: food sensitivity testing, adrenal function panel (cortisol), female or male hormone panel, thyroid

panel. Note: if you have recent blood work or other testing, bring it to your first appointment, or Dr. Annie can send for it.

Supplements

Specific supplements will be recommended based on your individual needs to help stimulate your metabolism, reduce inflammation, increase energy, and more.

FAQ

What's the cost?

- The cost will vary from patient to patient, but the basic cost of the visits as outlined above is:
 - Initial visit: \$200 + \$20 lipotropic injection = \$220
 - Weeks 2, 3, 4, 7, 11: (\$85 + \$20) x 5 = \$525 or \$30 x 5 = \$150 (no acupuncture)
 - Weeks 5 and 9: \$155 x 2 = \$310 or \$110 x 2 = \$220 (no acupuncture)
 - Week 13: \$90
 - Total (new patients)= \$1,145 or \$680 (no acupuncture)
 - Total (existing patients)= \$1,065 or \$600 (no acupuncture)

Or PAY IN FULL and get 10% off!

- Lab tests and supplements are extra. Lab tests vary from \$85-\$485, and supplements vary from \$22-\$70.
- Payments will be processed as services are provided. Direct billing is currently unavailable for naturopathic services. The patient pays directly to Complete Health, then can submit invoices to insurance. Check with your insurance provider to see what they will cover.

How much weight will I lose?

- The amount and speed of weight loss depends on many factors, including starting weight and adherence to the program recommendations. A heavier person can expect to lose more weight (20 lbs or more) faster than someone closer to their target weight. A healthy rate of weight loss is 0.5-1 lb per week, amounting to 6-12 lbs lost over the 12 weeks. More than that is associated with rebound weight gain since your metabolism is not used to your new weight.
- By taking what you learn in the program and continuing with your diet and exercise past the 12 weeks, you will continue to lose weight.
- The program may be repeated as often as you need.

How restrictive is the program?

- This program is **not** based on calorie restriction. It is more important to not exceed your normal daily calories, than to restrict them. Studies show that diet restriction is not

always effective, but overeating will cause weight gain. Calorie restriction can cause feelings of deprivation and is more likely to lead to binge-eating. We provide sustainable, healthy diet tips so that you can maintain your weight loss.

What's in the lipotropic injection?

- Our lipotropic injections help to stimulate the breakdown and elimination of fat, support liver detoxification, boost metabolism, and maintain insulin sensitivity, preventing sugar from being stored as fat.
- Each 1 mL injection contains:
 - Methionine, Inositol, Choline
 - B12 (1000 mcg)
 - Chromium
 - Carnitine
