Hormones Tested

Estrogen (Estradiol)
 Progesterone
 Testosterone
 DHEA

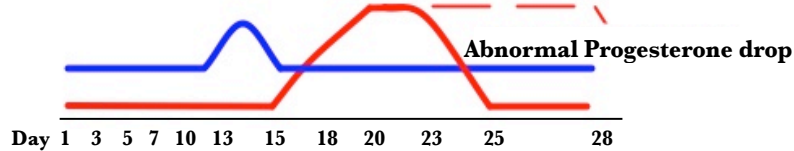

Eleven saliva samples are taken from Day 1 of the cycle to Day 1 of the next cycle. This gives us a complete map of your progesterone output, estrogen levels, and when ovulation occurs.

HORMONE BALANCE

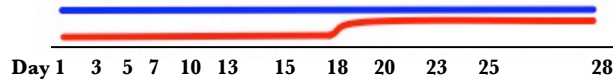

Normal Cycle

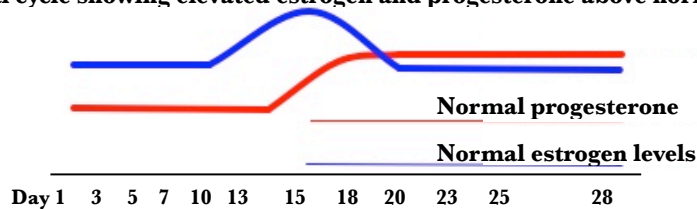

Peri - Menopause Cycle. Progesterone drops the second half of the cycle

Normal Menopause Cycle showing a leveling of estrogen and progesterone.

Abnormal cycle showing elevated estrogen and progesterone above normal
