Informed Consent to Treatment

The nature of chiropractic treatment: The doctor may use his/her hands or a mechanical device in order to move your joints. You may feel a "click" or "pop", such as the noise when a knuckle is "cracked", and you may feel movement of the joint. Various ancillary procedures, such as hot or cold packs, electric muscle stimulation, therapeutic laser, acupuncture or mechanical traction may also be used.

Possible Risks: As with any health care procedure, complications are possible following a chiropractic manipulation. Complications could include fractures of bone, muscular strain, ligamentous sprain, dislocations of joints, or injury to intervertebral discs, nerves or spinal cord. Cerebrovascular injury or stroke could occur upon severe injury to arteries of the neck. A minority of patients may notice stiffness or soreness after the first few days of treatment. The ancillary procedures could produce skin irritation, burns or minor complications.

Probability of risks occurring: The risks of complications due to chiropractic treatment have been described as "rare", about as often as complications are seen from the taking of a single aspirin tablet. The risk of cerebrovascular injury or stroke, has been estimated at one in one million to one in twenty million, and can be even further reduced by screening procedures. The probability of adverse reaction due to ancillary procedures is also considered "rare".

Other treatment options which could be considered may include the following:

- *Over-the-counter analgesics.* The risks of these medications include irritation to stomach, liver and kidneys, and other side effects in a significant number of cases.
- *Medical care, typically anti-inflammatory drugs, tranquilizers, and analgesics.* Risks of these drugs include a multitude of undesirable side effects and patient dependence in a significant number of cases.
- *Hospitalization.* In conjunction with medical care, hospitalization adds risk of exposure to virulent communicable disease in a significant number of cases.
- *Surgery.* In conjunction with medical care, surgery adds the risks of adverse reaction to anesthesia, as well as an extended convalescent period in a significant number of cases.

Risks from remaining untreated: Delay of treatment allows formation of adhesions, scar tissue and other degenerative changes. These changes can further reduce skeletal mobility, and induce chronic pain cycles. It is quite probable that delay of treatment will complicate the condition and make future rehabilitation more difficult.

I have read the explanation above of chiropractic treatment. I have had the opportunity to have any questions answered to my satisfaction. I have fully evaluated the risks and benefits of undergoing treatment. I have freely decided to undergo the recommended treatment, and herby give my full consent to treatment. I am here solely for the purpose of my health, and I represent no other agency, group, organization other than myself.

How We Protect Your Private Health Information

My "protected health information" means health information, including my demographic information, collected from me and created or received by my physician. This protected health information relates to my past, present or future physical or mental health or condition and identifies me, or there is a reasonable basis to believe that the information may identify me.

I consent to the use or disclosure of my protected health information by this office for the purpose of diagnosing or providing treatment to me, obtaining payment for my health care bills or to conduct health care operations of this office. I understand that **Dr. Batson, Dr. Butts, Dr. Bingham, Dr. McClure & Dr. Lamberth** may refuse to diagnose or treat me, if I do not consent to the use or disclosure of my protected health information for the above stated purposes. My signature on this document is evidence of this consent.

I understand I have a right to request a restriction as to how my personal health information is used or disclosed to carry out treatment, payment or health care operations at the practice. This office is not required to agree to the restrictions that I may request. However, if this office agrees to a restriction that I request, the restriction is binding.

I understand I have a right to review this office's Notice of Privacy practices prior to signing this document. This office's Notice of Privacy has been provided to me. This Notice of Privacy Practices describes the type of uses and disclosures of my protected health care information that will occur in my treatment, payment of my bills or in the performance of health care operations of this office. The Notice of Privacy Practices for this office is also provided upon request at the main administrative desk of this office. Notice of Privacy Practices also describes my rights and this office's duties with respect to my protected health information.

This office has the right to change the privacy practices that are described in the Notice of Privacy Practices. I may obtain a revised notice of privacy practices by contacting the Privacy Officer at **615-883-9903** and requesting a hard copy to be sent in the mail or by asking for one at the time of my next appointment.

I have the right to revoke this consent, in writing, except to the extent that this office or **Dr. Batson, Dr. Butts, Dr. Bingham, Dr. McClure & Dr. Lamberth** have taken action in reliance on this consent.

I have read, or have had read to me, the above consent. I have also had an opportunity to ask questions regarding the Privacy Policies, and all my questions have been answered fully and satisfactorily.
