

The logo for VAX-D features the word "vax" in a stylized, lowercase, blue font with a white outline. The "x" is formed by two intersecting lines. To the right of "vax" is a square icon with a white border and a black dot in the center, resembling a camera lens or a stylized "D".

VAX-D In Their Own Words

Dr. Moore

Since my accident in 2003 and from that moment on, the pain level on a scale from 1-10... it was an 11. My experience with this has been various rides to emergency, 6 MRIs, Cat Scans, X-Rays, about 80 trips to therapy that temporarily made the pain lighten until the next emergency. And of course visits to the doctor with a list of pain killers that numbed not only me but my bank account.

Well, pain is pain and you do not stop searching till you get the right answers. Fortunately I did. The drive to seek more help for this condition was fuelled by not being able to walk, missing out on my family and social gatherings, not being able to work, life was not LIFE. Laying down on the floor was the common role I played for several months during the years off and on.

Until VAX-D at Moore Chiropractic Group. This past year I suffered about 2 months before I went to Dr. Moore. The thought of another doctor in my life and disappointment were not on this years agenda. The process with Dr. Moore was different. The care and time he took with me, asking me the right questions and giving me detailed descriptive protocol with the VAX-D treatment was interesting and worth a try. The last time around. If this did not work I was going to get surgery.

It's July 2008 and I had 35 sessions under Dr. Moore and the VAX-D treatment. NO PAIN.... Need I say more or should I say MOORE. I have never had any treatment that had the quick results in the past 5 years. I can walk, I can sit, and do the normal things including sleeping. I can even sit at the dinner table. It has been worth the world to me considering just a few months ago I was immobile.

I recommend VAX-D to anyone who suffers from any back related pain. I was a severe case and now have a normal life. I wish I had found out about it and done it sooner. I will continue to be a patient in your dedication to my health.

I would like to thank you Dr. Moore for the care you and your staff have given me and helping me get "back" to my life.

Sincerely,

Tony Baggetta
