

# VAX-D In Their Own Words

Summer 2011

For over a year I was in so much pain I could not walk, run, sit down or lie down. Sleep was something I got used to not having. Melissa would give me a scale of 0 to 10 to judge my pain, and my pain was always a 10. It was affecting my home life as well as my relationship with my friends because I was so miserable all the time. I was unable to do my job properly so my hours were cut and I was losing out on my pay. My children would want to go for walks like we always did but I had to say no. I was so accustomed to being in pain 24 hours a day I got to the point where I thought it was normal.

Dr. Moore introduced me to VAX-D. I went for my MRI and was told by my doctor that there was absolutely nothing wrong with my back and she wanted me to go for a CT scan, which would only expose my body to some more radiation. I started VAX-D treatment the next day. When I first started my treatment I didn't notice a difference, but then gradually as it went on I noticed I was able to do the things I couldn't do like walking, sitting, laying down and sleeping. By the time I was done my treatment I was back to my normal self and I was smiling for the first time in over a year.

Thank you Dr. Moore and Melissa for all of your help and support through the whole treatment.

Sincerely,

Sharon Kirbyson
