

A Sensible Habit

Chiropractic is one of nature's ways of healing given to mankind,
Healing is allowed to express, freely, throughout the body, in great abundance,
In order to bring us into balance with life's vital energy flow,
Rhythmic flow of Intelligent Energy exists through this vast cosmic body,
Of which we may receive abundantly, by spinal adjustment, which allows this inner flow of life's pulsating action,
Pinched nerves produce a short circuit and cuts off this vital energy,
Releasing this, we replenish our energy supply, within our every atom,
Abundance of life's Intelligent Energy particles can then flow freely,
Creating an expanded awareness of healing power permeating within,
This brings the body, mind and soul into complete harmony with all reaction,
In thankfulness we receive - the calm, the peace, the feeling of well being,
Correcting our total being with the energy of life that exists making all particles pure and perfect
