These people are **relaxed** in **all** the pictures.

Yes, they are relaxed in the after pictures too!

The instructions before every picture were, "Breathe in, Breathe out and Let your body Relax and slump."

If your body is treated properly, your posture stays up all by itself.

And imagine how quickly you'll be out of pain!

I am perhaps positioned to understand what the best is. I teach chiropractors from coast to coast, being a chiropractor myself. Dr. Scott Simerman is the BEST chiropractic adjuster in the country and out of 70,000 chiropractors I can choose from, I choose him. I can say that with a great degree of certainty based upon direct knowledge and if he is your chiropractor, you are lucky. Dr. Mark S.

I've been to probably 10 chiropractors over the years, but there are two differences here. First, while several of them were quite good, none had this level of mastery of technique. Adjustment is a skill, and some chiropractors are better at it than others. This is the best I've ever experienced. M.S.

This practice is truly about wellness--my whole body feels better after each visit. I always leave feeling lighter and 10 years younger. A 5-10 minute adjustment is better than an hour-long massage. The results are fast and immediate. R.B.

This Work alleviated my pain, and it doesn't get any better than that! A.Y.

Within one visit I felt better than I had after five months of running from doctor to doctor! After several months of care I can walk pain free and have a much better quality of life. J.A.

The overall approach here is more comprehensive. You're not just treating your latest injury. You're treating the cumulative effects of all your past injuries. I am delighted with the results I've received! D.F.

The individualized attention given by Dr. Scott to meet my needs and his willingness to go the extra mile to assist in any way he can to be helpful are appreciated. Dr. Scott has helped me to live my life with ease and joy! He is an amazing healer. I trust him with my life. K.R.

Since 1982, we have successfully worked on people of all ages with:

- Low Back Pain • Disc Problems • Headaches • Migraines • Neck Pain • Allergies
- Arm / Leg Pain • Muscle Spasms • Arthritis • Sports Injuries • Fibromyalgia
