

Our Unique Approach to Your Total-Body Health

Everything in the body is connected. Our total-body approach will provide you with the proper treatment to restore your health & quality of life.

Our chiropractic practice is different from traditional chiropractic & medicine.

Applied Kinesiology focuses on correcting the underlying cause by adjusting any mechanical, energetic or nutritional disorders within the musculoskeletal system.

We regularly help people in chronic pain find relief & enjoy doing the things they love again.

Our patients experience the peace of mind that comes from knowing what is wrong & what they can do to help themselves. As proper nervous system function returns, your body will no longer need to attract your attention with aches & pains or other symptoms.

You will enjoy the benefit of an individualized total-body treatment.

You will be functionally muscle tested at each visit to determine the optimal treatment needed to alleviate your pain & restore your quality of life. Through our testing, we can uncover what is *short circuiting* your nervous system. You will begin to experience improved health as we find and remove the source of the blown fuses in your body one-by-one.

Change in the body takes time.

Most new patients require weekly treatment for 8 weeks to manage their acute pain. Each visit builds on the prior one. How quickly your body heals depends on your overall health & willingness to support your care at home. The treatments are very important, but they're just one part of your treatment plan. We're a team & your help is needed!

Your health & recovery are important to us.

We would like to assure you that you've come to the right place. We want you to enjoy your journey through the *4 Phases of Care* from relief to wellness.
