# The Severe Neck Pain, Back Pain, Headache and Auto Injury Report

The TRUE Story of How I've helped Thousands Enjoy Lasting Pain Relief – Without Drugs or Surgery

Dear Friend,

I want to tell you a true story about one of my patients. The first time I met Mary, I could tell she was VERY uncomfortable when she sat down across from me at my desk. As our conversation unfolded, she did her best to keep up a brave appearance, but it was obvious she could not sit or stand for long without being completely miserable. I knew the look – and I felt her pain – for several good reasons:

First, an active gym person and golfer myself, I've suffered with severe back pain myself, and I know EXACTLY how it feels. In fact, my own pain and long-term recovery are what ultimately inspired me to make healing others my life's work.

Second, I've seen that same look on hundreds of severe back and neck pain sufferers before. It's a pain that goes far beyond the physical. It's the look of fear, uncertainty, doubt and hopelessness. The look that attempts to mask not only the physical and emotional pain, but the REAL concerns that seem to take over:

- What if I become “hooked” on pain medication
- What if I have to go in for surgery?
- What if I have the surgery and it doesn't work?
- What if I CAN'T get better – and I lose my job?
- What if I'll never be able to (fill in yours) \_\_\_\_\_ again?
- And perhaps worst, of all – What if my pain never goes away?

As I watched Mary shift uncomfortably, I became more uncomfortable myself. The truth is, even if she believed in me, I had no x-rays or tests yet and wasn't even sure I could accept her as my patient. But there was one thing I DID know – so I took her hand, looked her in the eye and said, “Mary, I don't know HOW I can help you yet – I just know I'll make sure you get the help you need – whether it's from me or another doctor.”

Today, I'm offering the same to you...

I don't know your personal story or why you requested this report. But I do know that whatever your pain, or whatever you've been through, this is not your fault. More importantly, **YOU ARE NOT ALONE!** In fact, over the years, I've treated hundreds of people just like you who were convinced they had “tried everything” – from painkillers, supplements, physical therapy and massage to neck braces, spinal injections – even surgery. They came to me confused, desperate – even dumbfounded, asking:

“Why didn't my doctor or therapist do this sooner?”

The simple answer is that there are **3 CRITICAL STEPS** to treating your severe back, neck, headache pain or auto accident injuries and giving you the long-term relief you need. Sadly, despite the best intentions of family doctors, physical therapists, pain management doctors and spinal surgeons, there are very few experts out there who can do all three of them like Precision Spinal Care when it comes to diagnosing and treating mechanical spine pain.

My comprehensive diagnosis and treatment plan ensures that all three bases are covered, giving you the best chance for significant, long-term pain relief. It starts with:

### **1. Proper ANALYSIS with the Right Tools**

There's no question that a thorough history, examination and proper ordering of images are absolutely essential to diagnose the cause of your pain vs. just experimenting with treatment based on incomplete facts. I'll meet with you one on one and use whatever tools necessary to accurately assess your current condition and quickly address your pain.

### **2. Proper TREATMENT based on your diagnosis.**

Based on your diagnosis, we will make sure you receive the proper treatment that addresses the cause of your pain. There is no BEST treatment for everyone, treatment options should be based on the diagnosis of what is actually causing your pain and your diagnosis is based on objective testing that is medically recognized and accepted.

### **3. Proper Re-examination to make sure you are responding to your treatment plan.**

Of the three crucial steps, this is the one most likely to be missed. Whatever treatment plan you choose, regular re-examinations should occur to evaluate the effectiveness of the plan from subjective pain relief to objective improvement with functional exams and even post imaging

studies. We have a saying in NUCCA (our specialized technique for mechanical spine pain) – the proof is in the post – meaning we base our results on objective images taken before and after.

As the only board certified NUCCA (National Upper Cervical Chiropractic Association) practitioners in the entire state of Virginia, I specialize in this highly advanced technique of gently correcting the upper cervical area to realign the spine so your body can begin to heal itself. The adjustments are safe AND gentle – with no popping or cracking. Some of my patients have been aligned the very first day and never need another adjustment.

### **I can't cure everyone – but I MAY be able to help YOU!**

I know the frustration, fear and worry that goes with trying treatment after treatment without long-term. After years of treating severe neck, back and nerve pain, I also know a good candidate when I see one. So if I look you in the eye and say “I’m willing to accept your case”, you can be darned sure I’m confident you’ll be feeling better in short order. In fact, I’m so certain of this that I’m offering you a true Satisfaction Guarantee. If you become a patient and stick with your recommended treatment plan, I guarantee you’ll be satisfied with your experience in dealing with me and my team.

### **Call 382-5555 for your FREE, No-Obligation Consultation.**

**Once we meet and discuss your options, if we decide to move forward with an examination and x-rays the cost will only be your specialist co-pay. If you do not have insurance, the exam is \$20 and if imaging is needed we only charge \$50 for x-rays, so the most the visit will be is \$70 to have the information we fully need to determine the cause of your pain. If you are a personal injury patient (auto accident) we can usually see you with no out of pocket costs.**

Our appointments fill up fast so please contact us as soon as possible so you can secure one of our appointments so I can give you the personalized care and attention you deserve. When you call, we’ll ask you a few brief questions before we schedule a convenient appointment in our Chesapeake (Greenbrier area) office.

Once here, I’ll give you an honest face-to-face recommendation based upon your personal history and advanced evaluation. I promise you will know BEFORE you ever spend a dime whether I can help you or not. It’s important to remember that almost all of my patients come to me at our first meeting feeling completely hopeless. They worry they might NEVER get better. I sincerely hope that as you read this report, you realize that there is GOOD reason for you to have hope again. If I can leave you with just one thought, it’s this:

### **YOU ARE WORTH IT!**

I’ve treated THOUSANDS of people who have incredible stories of hope, courage and success. You deserve a chance to live an active, healthy life – free from pain! Call me today and let me help!

My Kindest Regards,

Dr. David Packer  
Precision Spinal Care  
1305 Executive Blvd, Ste. 170  
Chesapeake, VA 23320  
757-382-5555  
precisionspinalcare.com

P.S. I have also included an office information brochure so you can find out more about myself, my training and credentials, and also see reviews from our wonderful patients we like to consider part of our practice family.

P.S.S. I have also added an article I wrote on the treatment options for chronic pain. Please read and let me know if you have any questions, I'm here to help.
